TO WHOM IT MAY CONCERN

This is to certify that **Joyanta Debnath** has been working with the Institute of Water Modelling (IWM) from 17th July 2025 to 20th July 2026 as a Junior Engineer in the Water Supply and Sanitation, and Urban Water Management Division. Since joining, he has been actively involved in household and sanitation surveys, GIS map preparation, Design Drawing Preparation, Sludge sampling and water demand analysis. Additionally, he contributed to developing practical solutions for improving water supply and sanitation problems in low-income communities (LIC), and technical documentation in connection with different local and donor-funded projects of IWM. His involvement in major projects at IWM is as follows:

1. Dhaka Water Supply Network Improvement Project (DWSNIP), Client: DWASA.
2. Extended Dhaka Water Supply Resilience Project, Client: DWASA.
3. Urban Climate Resilient Infrastructure Project (Phase-2), Client: LGED & KfW.
4. Updating Sewerage Master Plan for Dhaka City, Client: UNICEF.
5. Detailed Design, Drawings and BOQ Preparation for Trust Green City Area, Client: Army Welfare Trust, Bangladesh Army.
6. Feasibility Study of Legacy Pollutant Removal and Disposal from Buriganga River Under the Preparatory Work for Metro Dhaka Water Security and Resilience Program.

To my understanding, Joyanta Debnath has gathered wide experience in water supply and sanitation schemes and sufficient knowledge and physical understanding of the water resources along with GIS-based field data collection, and technical report preparation. He developed skills in several GIS and modelling tools, including AutoCAD, Drainage profiling, Python, Data Automation, ArcGIS, QGIS, SketchUp, Lumion, Autodesk Civil 3D and Riverbed soil boring.

During his service in this institute, he is always found to be honest, sincere, dynamic, and devoted to his duties.

I wish him every success in life.

Tanmay
